| *              | Please indicate which scope(s) handle the material in case the certificate covers more than one scope. This does not apply for the following scopes: Trader, Trader with storage, Warehouse, Logistic Center, MTBE and ETBE plant  |                 |                  |                          |   |                       |
| <sup>1)</sup>  | 1: Default value   |                 |                  |                          |   |                       |
|                | 2: Actual value  |                 |                  |                          |   |                       |
|                | 3: NUTS2 value or "NUTS2-equivalent" value. A "NUTS2-equivalent" value is a GHG value for cultivation in a "NUTS2-equivalent" region of a country outside the European Union (values are implemented by the European Commission). Option 3 is only applicable for the level of cultivation, i.e. for first gathering points, farms/plantations, central offices (group of farms or independent smallholders) |                 |                  |                          |   |                       |
| <sup>2)</sup>  | Yes: The raw material meets the definition of waste or (processing) residue according to the RED II  |                 |                  |                          |   |                       |
|                | No: The raw material complies with the relevant sustainability criteria according to Art. 29 (2)-(7) RED II  |                 |                  |                          |   |                       |
| <sup>3)</sup>  | Farm Sustainability Assessment (FSA) was developed by the Sustainable Agriculture Initiative (SAI)   |                 |                  |                          |   |                       |
|                | SAI Gold Compliance: ISCC Compliant material can be claimed as "SAI FSA 3.0 Gold Level Equivalence"  |                 |                  |                          |   |                       |
